RE: Docket No. GMCB0012-14con, Renovation of Emergency Department and Construction

Dear Donna,

Thank you for responding to my phone request this past week regarding my questions regarding the Emergency Department Nurse Call System. Below are the details of my request for a jurisdictional determination.

- We have an approved CoN (GMCB0012-14) for renovations of the ER. Renovations will not begin until December 2015.
- The existing Nurse Call System – Dukane ProCare 2000 is no longer supported by the Vendor and parts to repair it are not available.
- RRMC never planned on replacing the existing system in the CoN project. Our plan was to add the new exam rooms to the existing system.
- The existing system was installed in 2002.
- Given that parts are not available to us and given that a nurse call system is required we have no choice but to replace it. The cost of replacement is \$82,697 (see attached quote) plus a 10% contingency for a total replacement cost of \$90,967.
- The determination I am looking for is whether this unanticipated equipment cost needs to be added to the ED CoN or if we can expense it using our normal capital process.

Thank you for evaluating this for us. Looking forward to your response.

Sincerely,

RUTLAND REGIONAL MEDICAL CENTER

Mary T. Nemeth, VP
Support Services
